

A BASIC GUIDE TO THE CORQ APP

DOWNLOAD THE APP ⁰¹

On your phone, go into your app store and find the Corq app to download to your phone. The photo to the right is what the app looks like.

02

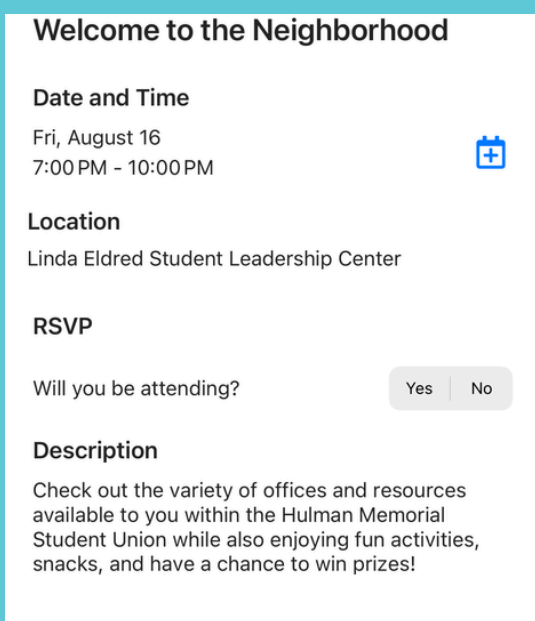

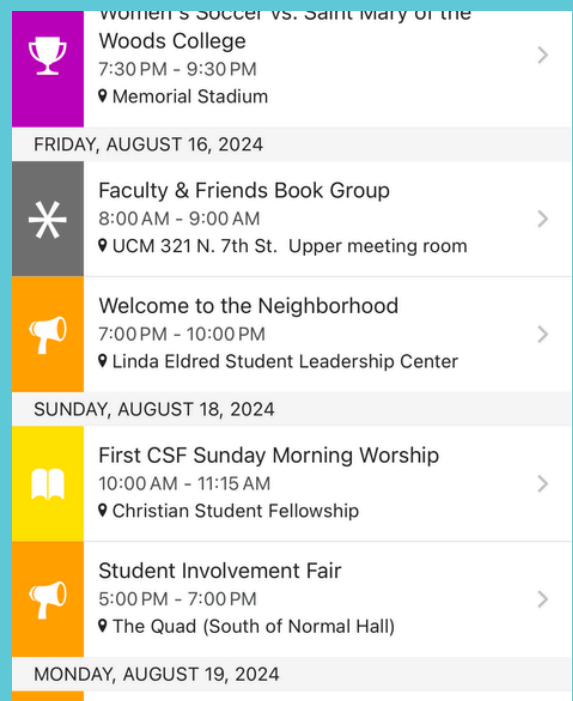

SETTING YOUR ACCOUNT UP

Once you've downloaded the app, be sure to sign in and choose the correct campus. From there you can click on "Campus Events" to see all events that have been added into Treehouse. Once you start saving events, you can find them under "My Events".

If you click on "Organizations", it'll show you all the organizations on campus that have a Treehouse page.

EXPLORING EVENTS ⁰³

As you begin to explore, you'll see a list that looks similar to this. This will include all events that have been added to Treehouse. The different colors of icons represent the different types of event categories they've been logged as. For example, the orange megaphone represents Social Engagement.

04

INTERESTED IN AN EVENT?

Notice an event you want to attend? You can click "Yes" to will you be attending and it'll show up under your tab "My Events". It'll also send you a confirmation email. Want it added to your calendar? Corq does that too. Just click on the blue calendar button and it'll take you through the steps to get it added to your calendar.

Important to note, you cannot add events into Corq. They MUST be entered through Treehouse. If you need any help getting events added into Treehouse, please contact Ben Kappes or Nicole Hageny.
