Interior Architecture Design

Built Environment Department

Description of major: The Interior Architecture Design major allows students to express their creativity through design. Students will begin by gaining foundational knowledge including but not limited to sketching, two-dimensional technical drawings, color, materials, and elements and principles of design. Students build upon this knowledge in lectures and design studios that work hand and hand creating complete understanding of our built environment. In the design studios, students design projects that increase in size and complexity from single-family homes, multi-residential units, corporate offices, historic buildings, and healthcare buildings ranging from 2,000 to 40,000SF. All while learning the important components of design, interiors, and architecture all come together to create the spaces we exist in every day

Math Requirement: Basic Foundational Studies Requirement

Science Requirement: Basic Foundational Studies Requirement

Hands on/Lab Based: Yes

Theoretical/Analytical: Yes
