

Scholar Testimonials

I chose AHEC scholars because I grew up in an urban area and wanted more experience and knowledge about rural healthcare. The most valuable part of the program is getting to network with other AHEC scholars and completing the capstone project. I have learned so much by working with other scholars and getting to see different perspectives on how to approach rural health disparities. The program also has online coursework which allows you to gain understanding of various topics and in-person activities that are valuable. I will be able to take the knowledge from this program to help best serve my patients.

Genetic Counseling 2022

I did AHEC scholars because I wanted to get an opportunity to learn about other health professions. We all work together in the hospitals all the time so I wanted to have a better understanding of what each profession did and how we all work together to help our patients.

The program was really great! My favorite part of the program was working on our project and getting to know all of the people working on my team. It was really rewarding to get to work on a project over a couple of years and see it come to life! As I pursue my career in medicine, I know I will better know how to work with my future colleagues and have the skills to work on projects with people from all over the healthcare spectrum!
